This slide contains an animation or narration. Press the play button to view it.

Voiceover:

When you login to the ECCITING Case review website, you will see a list of Cases.

Each case has a number (“alias” in the image) which will allow you to communicate with us any problems or bugs related to any specific case.

The case numbers are different for different users, both to preserve anonymity of each cases & to minimize cross-talk between delegates.

Click on “Start” to review a case.

This slide contains an animation or narration. Press the play button to view it.

Voiceover:

When you start a case, the screen will be divided into an upper frame & a lower frame.

The images & image controls are in the upper frame. Generally the image set will be presented in two orthogonal cross-sections: axial on the left; sagittal on the right.

The questionnaire questions & navigation buttons are in the lower frame.
