

Systematic Management Archiving and Reviewing Trial Images Service (SMARTIS)

Imaging Study Outline Form

This form enables interested parties to provide the SMARTIS team with enough information to develop a management service plan for their research project or clinical trial. In addition, it will allow us to estimate the likely costs and resources required for your project.

If any of the information points are unclear, please leave blank, we can discuss and refine all points via phone interview at a later date.

Trial name:

Type of trial: e.g. RCT, case-control, retrospective/prospective:

Trial website/registration info/location of protocol (can be separately uploaded):

Provisional recruitment start date:

Imaging requirements:

	Expectation	Comments
Type of imaging (modality, please list all sequences required):		
Number of scan studies/patient, and scan study time points:		
Number of patients:		
Number of centres/countries:		
Duration of study:		
Expected recruitment rate (per month, once study up and running):		
Imaging transfer method (online or physical media via post)		
Do you need us to provide quality control of data? If so, who does this, parameters, how strict:		
Do you need us to provide support for imaging review via our Systematic Imaging Review Service (SIRS)? If so, what will be analysed and how, and by whom:		
Will a pre-trial reliability analysis be needed?		
Do you need us to provide support for scan management, e.g. scan housekeeping needs, scan queries tasks, storing of raw data etc.		
Do you need us to provide statistical analysis of results? If so, which data, what type of analysis		
Potential for additional costs, i.e. travel for meetings, additional admin
