

Hear what our current students have to say...

Student1 MSc – 'I really value the flexibility of studying online, as I can still work and have time for my 3 children'.

Student2 MSc – 'I am already applying my new knowledge in my day to day work as a physio.'

Student3 MSc – 'The materials used in Techniques and Physics were well written and interesting, and I really enjoyed the activities in the Neuro-anatomy & the Body anatomy course too'.

Student8 MSc – 'I am thriving on being able to engage with like-minded professionals across the world, from my current remote posting'.

Student6 MSc – 'I really enjoyed the Digital image processing and analysis course, and think the programme is fantastic'.

Student 10 MSc – 'I am finding the courses very interesting and feel they have enhanced my psychiatry work'.

Student4 MSc – 'The material and self-directed learning were challenging in a good way at the start, and I am really enjoying the programme content'.

Student5 MSc – Likes the combination of video, voice overs and printed material, as it keeps the learning interesting. Is already finding what he has learnt very useful in his current role as a trainee radiologist.

Student9 MSc – After only one course, I am confident that this programme will fill the gaps around imaging, that were left after graduating from medical school.

Student7 MSc – The information provided about literature reviews and having access to the UoE Library online is extremely helpful.
